

## Air Cargo China

---

### Asia's leading event for air cargo and logistics

Air Cargo China—exhibition and conference—is Asia's most important business event for the air cargo industry.

The 2012 exhibition marks the fifth time that this event is being held in conjunction with transport logistic China, the leading exhibition for transport and logistics in the Asian region. In 2010, more than 13,500 visitors attended the exhibition to gather information about the latest developments of some 440 exhibiting companies and to invest in new solutions—a new record and further proof of the exhibition's continued growth since 2004.

Air Cargo China is being held at the Shanghai New International Expo Centre from 5–7 June 2012.
